[reza.neoma@gmail.com](mailto:reza.neoma@gmail.com) • 256-893-4564 • <https://www.linkedin.com/in/neoma-reza/> • [nareza-hub.github.io](https://github.com/nareza-hub)

## EDUCATION

**The University of Alabama – Tuscaloosa, AL**

Aug 2022 – May 2026

**Bachelor of Science in Computer Science, with a minor in Computing Technology and Applications**

**Honors:** Thomas N Francis Endow Sch., Mara A. Mceniry Endow Sch., J Hubert Scruggs JR Sch., Edwin F Averyt Sch., Dr H Grady Jones Sch., Tutwiler Opportunity Sch. | President's List: Fall 2022, Spring 2025 | Dean's List: Spring 2023

## EXPERIENCE

**Jordan & Skala Engineering – Plano, TX (Remote)**

*Software Engineering Capstone – Industry Sponsored*

January 2026 – Present

- Develop a Python-based web application using Streamlit, custom CSS, and structured JSON configurations to support 10+ building types, enabling dynamic user input collection and schema-driven form rendering.
- Engineer an automated Word proposal generator using Python (python-docx), programmatically transforming validated JSON-driven project data into 20+ page branded documents with structured formatting and dynamic content injection.

**U.S. Pipe and Foundry (a Quikrete Company) – Birmingham, AL**

*Manufacturing Operations Analyst (Process Improvement & Automation) – Part-Time*

Aug 2025 – Present

- Analyze and transform Learning Management System (LMS) datasets using SQL and MS Excel PivotTables to support leadership-level reporting across 4 production plants and 1,500+ users.
- Author structured end-user and administrator documentation that formalizes system workflows and operational procedures within the LMS, improving usability and reducing onboarding friction by ~70%.
- Design and implement a relational ladle-usage tracking database in MS Access to track multiple ladle types and material categories, recording month-over-month cycle counts and tonnage metrics with lifecycle reporting.

**U.S. Pipe and Foundry (a Quikrete Company) – Birmingham, AL**

*Operations Intern (Process Improvement & Technical Automation)*

May 2025 – Aug 2025

- Certified Lean Six Sigma Yellow Belt by leading a process improvement project utilizing 5-Why Root Cause Analysis (RCA), implementing corrective and containment actions that achieved ~64.5% ROI, and conducting a Rapid Improvement Event (RIE) using downtime data to develop a 7-area diagnostic troubleshooting guide.
- Architect and deploy a JSON-driven LMS help-ticket system using Microsoft Power Automate with automated email routing and centralized Excel logging, while resolving 30+ defects to improve system reliability and data integrity.
- Designed an AI-powered chatbot prototype using MS Copilot Studio and Power Automate, defining intents, guarded topic flows, and role-based access controls for compliant LMS support.

**The University of Alabama – Tuscaloosa, AL**

*Resource Acquisition and Discovery Assistant*

Mar 2023 – May 2025

- Streamlining document cataloging by efficiently processing 50+ records weekly using MS Excel, CZUR, Voyager Catalog, and OCLC Connexion software, ensuring accurate cataloging and efficient data retrieval.
- Enhancing digital archival processes, automated data processing scripts, and reducing manual entry time by ~45%.

**Society of Women Engineering – Tuscaloosa, AL**

*Information Technology Support for UA Capstone Village*

Oct 2022 – Jan 2023

- Provided personalized technical support to 4-5 retirees weekly, resolving software updates, connectivity issues, and complex device troubleshooting for laptops, tablets, and smartphones, enhancing overall digital literacy.

## PROJECTS

- **Embedded Systems Project – PIC24, MPLAB, C & Assembly – Fall 2024:** developed an embedded system using PIC24 microcontroller to control an LED via a tactile switch, programming in both C and assembly for direct hardware interaction. Configured I/O pins and pull-up resistors to manage user input and output behavior.
- **Computer Networking Labs – Internet Protocols – Fall 2025:** completed hands-on networking labs focused on TCP/IP and client-server communication using Linux virtual machines, analyzing network behavior through practical implementation.

## SKILLS, INTERESTS & ACTIVITIES

**Programming:** C, C++, Python, SQL, Assembly, HTML, CSS

**Software & Tools:** MS Excel, CZUR, Voyager Catalog, OCLC Connexion, VS Code, MATLAB, MPLAB, Git, Microsoft Office, MS SQL Server, Eclipse IDE, GitHub, FileZilla, KiCad, MS Power Automate, MS Access

**Certifications & Badges:** MS Excel Purple Belt, MS PowerPoint White and Yellow Belt, Lean Six Sigma Yellow Belt

**Activities:** Phi Sigma Theta, Alpha Lambda Delta, Society of Women Engineering, Asian American Student Association
